## Attendees:

Andrew Hunter (organizer)
Stefan Stein
Ehsan Mohammadi
Ebrahim Poorazizi

## Minutes

| Discussion/Action Item |
| --- |
| **Topic I- Demo of Elgg 1.7 functionality with plugins** |
| • Groups- may be a good template for "development project" |
| • Events- through Google Maps |
| • Image Galleries |
| • Commenting and Like buttons (Hyperframework) |
| • Polls- but currently not working |
| • Checking for the (re-)styling capabilities of the interface (CSS) |
| • Discussion of Elgg 1.7 vs. 1.8 |
| **Topic II- Questions by Andrew** |
| • How can we make the platform design place-centric (by case study location)? |
| • How could we integrate a "preference map" that allows to mark locations by pushpins that are liked/disliked in a community or that are seen as problematic? |
| • How can we integrate a tool to upload photos and to rank and comment on those (with a map location reference)? |
| • How could a tool look like that allows to compare and rank different development scenarios (presented as images)? |
| **Topic III- Design drafts/mock-ups for Platform Prototype Milestone I** |
| • A tool that shows a map (within Elgg) that allows to add pushpins to the map with the following functionalities: <br> ▪ Liking/disliking a locations <br> ▪ Adding comments to that pushpin/location <br> ▪ Browsing other submitted preferences/pushpins <br> ▪ Agree/disagreement options |
| • A tool that allows to upload pictures with the following functionalities: <br> ▪ With/without a map location |

- Allowing to publish the pictures
- Allowing to comment and rank the pictures by others

- A tool that allows to compare development scenarios based on images with the following functionalities:
  - Selection of scenario location or type of detail (e.g. House types, road types, vegetation, etc.)
  - Displaying several images at the same time (open question: how many per same scenario and how many scenarios at the same time?)
  - Rank and commenting options for each scenario

## Topic IV- Discussion on Web page & PYP logo
- Restyling publication section
- The PYP logo documents will be available on the SVN

## Topic V- Tasks
- Stefan:
  - Drafts for 3 Mock-ups (see above) due to next meeting on Monday
  - If time permits: test setup-up of development framework (LAMP Server, Aptana, Subversion-Client to develop on Elgg locally)
  - Check documentation for upgrade of Elgg 1.7 to 1.8, or
  - Parallel install of 1.8 on server

Note: Stefan will work on the mock-up drafts tomorrow - the rest is encouraged to do so as well if time permits. The goal is to reconcile those drafts on Monday, and then create the final mock-ups in LucidChart ready for presentation on Friday.

- Ehsan
  - Contacting Francisco: asking for PYP general page design, asking for "Mock-ups of the development scenarios of a particular crossings"
  - Drafts for 3 Mock-ups if possible
- Ebrahim:
  - Other website ToDos,
  - Drafts for 3 Mock-ups,
  - Send PYP architecture draft to all (after Monday?)

## Topic VI- Next meeting
Monday, October 31 2011:
- Merging/reconciling of mock-ups
- Further developments until workshop
