

## Attendees

Andrew Hunter (organizer)  
Steve Liang  
Francisco Alaniz Uribe  
Stefan Stein  
Ehsan Mohammadi

## Minutes

Discussion/Action Item	Due Date	Responsible
<b>Topic I – DRAFT Architecture</b>		
 <p>The diagram illustrates a three-layer architecture:</p> <ul style="list-style-type: none"> <li><b>UL Layer:</b> Includes OpenLayers (with touch screen support), a browser interface (HTML 5 / JavaScript / PHP), a webservice, and GeoServer (with Mapserver degree and Apache &amp; Tomcat).</li> <li><b>Middleware:</b> Includes business rules, app servers, web services, and security. A note for web services lists: Social media platform ELGG (+ User modelling, + feedback), Middleware for mobile services, Mobile apps, User education information (+ sidewalks, + street trees, + setbacks, + shared space, + mixed use, + etc.).</li> <li><b>Data Layer:</b> Includes a database (PostgreSQL with PostGIS (have installed) and MS SQL Server) and data (City of Calgary, U of C Library, Urban Lab, etc.).</li> </ul>		
<b>Topic II – Initial tools</b>		
<ul style="list-style-type: none"> <li>Social networking platform, ELGG, <a href="http://elgg.org/">http://elgg.org/</a> test and initial implementation</li> </ul>	mid Oct.	Ehsan
<ul style="list-style-type: none"> <li>Authentication service / user management, ELGG, initial implementation and test</li> </ul>	mid Oct.	Ehsan
<ul style="list-style-type: none"> <li>User education tools               <ul style="list-style-type: none"> <li>Select one intersection and develop images within Photoshop that enable users to visualize various development options and provide feedback via the social networking tools</li> <li>Development options matrix</li> </ul> </li> <li>Photoshop imagery</li> <li>Web map design</li> </ul>	Aug. 12, 2011 mid Oct. mid Oct.	Francisco Francisco Andrew,
